

To Whom it May Concern at the FCC, I subscribe to XM and listen to it daily. It has been a wonderful and helpful addition to my daily life as a trucker. Especially the weather and traffic stations that were just added. When I get close to a major city, it's nice to be able to just turn to a station on my XM Radio for the latest traffic and weather rather than trying (usually without success) to find a station that is giving me the information I desperately need when I need it on regular radio. I pay for the services on my XM Radio and deserve to have programming that benefits me as a truck driver. I can't get the quality and variety that XM provides anywhere else. It should not be up to the National Association of Broadcasters to dictate what I need and should be permitted to hear. I respectfully urge you to reject the NAB's petition 04-160 and allow me my rights to utilize the terrific services that I recieve from XM Satellite Radio.

Repectfully Yours,

Elizabeth M. Zelten
